Re: Response to OPP's preliminary human health risk assessment
Tetrachlorvinphos (Chemical ID No. 083701; Case No. 0321)

Dear Mr. Fuller:

On behalf of Boehringer Ingelheim Vetmedica, Inc. (BIVI; formerly Fermenta Animal Health Company), SRA International, Inc. is responding to the Agency's preliminary human health risk assessment for Tetrachlorvinphos.

As directed by the Agency, our review consisted solely of identifying errors and Confidential Business Information (CBI) contained within the document. No errors were found. It should be noted, however, that due to the short review period allotted, a thorough assessment regarding the overall accuracy of the information could not be conducted. No CBI was identified.

With regard to planned studies, BIVI is awaiting the Agency's review and approval of three Magnitude of Residue study protocols (ruminant, swine, hen) previously submitted by BIVI/SRA. Once these reviews are completed and any study conduct-related issues are resolved, we will proceed with scheduling and conducting the studies. A study time table can be provided at that time.

Should you have any questions regarding this response, please call. Thank you in advance.

Sincerely,

Frederick T. Smith
Regulatory Scientist

MESSAGE:

Dear Iain,

I refer to your fax to Steve Burman today. Unfortunately, Steve is on holidays and won't be back until the 18 January.

However, I managed to contact the Queensland DPI and they faxed to me the first 10 pages of the relevant booklet. From the covering fax and from the pages faxed to me, it would appear that there is no page 2 to the Introduction of the booklet. It would appear that there has been a misnumbering in the typing of the booklet pages.

If you need further information I would suggest you contact Patrick Jones of the QLD DPI. His phone, fax and email details are on the fax cover sheet.

I hope this is satisfactory. Good luck!

Regards,

Lynne Wirth
Regulatory Affairs Officer
